DOMESTIC STEP LADDER WITH ALUMINIUM FRAME AND PLASTIC TREADS

FEATURES

- Aluminium household step ladder
- Non-slip blue PVC treads
- Non-slip, non-scuff blue PVC feet
- Strong handrail for extra safety
- Compact, folds away for easy storage
- No sharp edges to damage furniture or clothing
- Rust, rot and splinter proof
- Strong, safe design ensures lifelong safety
- 2 year warranty
- Safe working load 100kg
- Maximum static load rating MSVL - 130kg

AP 300
Without Stabilizing Bar

### Features

- Versatile 3-in-1 step-extension ladder, A-frame or single lean-to ladder
- When used as a two-section push-up extension ladder, the height can be varied by 300mm increments
- Engagement of safety lock makes a strong conventional step ladder
- Wide foot base on back legs gives good sideways stability and strength (applicable to the AP420, 540 and 660 only)
- Practical indoor and outdoor applications and easy storage
- Robust aluminium construction
- Rust, rot and splinter proof
- 2 year warranty
- Two rung overlap when extended

</tr>
</tbody>
</table>
**Features**

- Unmatched combined benefits
- Only GRAVITY can offer the benefits of flat platform rungs combined with box section side rails which give these exclusive combined benefits
- Platform rungs give increased safety and comfort while reducing fatigue
- The box side rails stop ladder ‘twisting’ in the way in which ‘C’ section side rail ladders do
- The patented rung/side rail joint further prevents ladders ‘twisting’ in the middle whilst climbing
- The box side rails give good sideways stability - about 2.5 times better than ‘I’ beam side rail ladders
- Our rung/side rail joint reduces wear preventing loosening of rungs
- The much larger ‘platform rung’ is about 4 times stronger than a round rung and will not bend
- The stronger rung prevents rungs from pulling out of the side rail inwards
- The larger rung prevents rungs ‘punching through’ the side rail
- The ‘interlock’ side rails eliminate clamps and the damage often associated with clamps
- The GRAVITY safety ladder locks prevent accidental lowering of the ladder and related dangers
- Square rungs prevent rung turn
- GRAVITY rope and pulley system for easy extension
- Maximum static load rating MSVL - 150kg

- The box side rails stop ladder ‘twisting’ in the way in which ‘C’ section side rail ladders do
- The patented rung/side rail joint further prevents ladders ‘twisting’ in the middle as you climb up
- The box side rails give you good sideways stability - about 2.5 times better than ‘I’ beam side rail ladders
- Our rung/side rail joint reduces wear preventing loosening of rungs
- The much larger ‘platform rung’ is about 4 times stronger than a round rung and will not bend
- The stronger rung prevents rungs from pulling out of the side rail inwards
- The larger rung prevents rungs ‘punching through’ the side rail
- The ‘interlock’ side rails eliminate clamps and the damage often associated with clamps
- The GRAVITY safety ladder locks prevent accidental lowering of the ladder and related dangers
- Square rungs prevent rung turn
- GRAVITY rope and pulley system for easy extension
- Safe working load 125kg
- 2 year warranty
- Maximum static load rating MSVL - 175kg

### DHA/THA Range
